PROPERTIES

Model name

Low Profile T40-119X-925

Depth

40 mm

Effective width

925 mm

Width of valley

40 mm

Width of crown

119 mm

Minimum length

600 mm

Maximum length

12000 mm

MATERIALS

Material	Material thickness (mm)	Weight (kg/m ²)	Surface treatment
Steel	0.6	6.36	Polyester
Steel	0.7	7.43	Polyester

COLOURS & COATINGS

GALVANIZED

Metal coating improves the corrosion resistance of steel and extends product lifetime. Zinc-coated steel sheets are suitable for applications where corrosion resistance is required. The corrosion resistance provided by the zinc coating is in direct proportion to the thickness of the zinc layer.

POLYESTER

Polyester for outdoor use is an economic coating for wall profiles in warehouses and other buildings. It is recommended for the construction industry. It is suitable for applications where coating is not used under extreme conditions, nor is there high requirement of long-term use. This coating offers a wide colour selection and budget price.

HIARC

Hirac is recommended for the construction industry. It has supreme colour and gloss durability, and metallic colours are available. The Hirac colour coating has been developed especially for facades. It has excellent resistance to corrosion, excellent resistance to UV radiation and it is easily kept clean.

Coating	Colour
Poliester	RAL1015, RAL7035, RAL9006, RAL9007, RAL9010

COLOURS

RAL1015 LIGHT IVORY

RAL7035 LIGHT GREY

RAL9006 SILVER

RAL9007 GREY
ALUMINIUM

RAL9010 WHITE

ACCESSORIES

Facade cladding system, completed with flashings, fasteners and support studs, provides a fully finished facade, as well as quick and easy installation.

Ruukki's Design profile façade accessories can be used for low profile products.
